

Games of the Century™

# THE ENTITY

The title 'THE ENTITY' is rendered in a large, bold, black, blocky font with a white outline. The letters are set against a background of a futuristic, sci-fi environment. The background features a perspective view of a corridor or a large, open space with a grid-like floor and walls. The lighting is dramatic, with bright blue and white highlights and deep shadows, creating a sense of depth and mystery. The overall aesthetic is reminiscent of classic science fiction or horror themes.

# The Entity

## THE SET UP

Set up your video computer system controller as instructed in your owner's manual. Turn the power OFF and insert the Entity game cartridge.

## TO BEGIN

Turn the power on. Use the Game Select lever to select the initial play level, and then press the Game Reset lever or the joystick button to start the game. Now get ready for some fast action fun,

## THE OBJECTIVE

The objective is to move the Entity to the highest possible level of existence before running out of energy. This must be done rapidly to prevent the Entity from being pushed into the vat of liquid helium at the base of the screen.

## THE CONTROLS

After locating the next barrier's portal, position the containment walls at the edges of the portal. Push the Joystick left to move the right containment wall to the left; push the joystick right to move the left containment wall to the right. When a containment wall is in position at the portal, it locks in and turns red. The Entity senses that you are about to trap it. It turns red and speeds up. After being locked in, a wall may be reset to its starting location by pushing the joystick backward. Pushing your joystick button sprays liquid helium on the Entity to slow it down.

The Entity will regain its speed as it thaws.

The Entity increases speed each time it is transferred to a higher plane of existence. Higher speeds cause it to be more resistant to your containment effort. If you can't contain it by the time it moves to the bottom of the screen, it will be frozen in the vat of liquid helium. Then, if there is energy on reserve, it will re-materialize at a slower, cooled down speed.

### SCREEN DISPLAY

During the game, your score appears at the top of the screen above your reserve energy indicator and

helium supply indicator. The current plane of existence is displayed at the bottom of the screen. After a record breaking game, record your score and final plane of existence on the back of this booklet.

## PLAY LEVELS

Push the Game Select lever to select the starting game difficulty level. All game levels get progressively more difficult as the Entity is raised to higher planes of existence.

Levels 1 or 5 Beginning

Levels 2 or 6 Advanced

Levels 3 or 7 Expert

Levels 4 or 8 Easy Play

Levels 5 through 8 feature an invisible Entity.

Left Difficulty Switch:

Position A - Constant speed containment walls.

Position B - Accelerating containment walls.

The Right Difficulty switch and the B/W-Color switch have no effect on the game.

## SCORING

The closer you can keep the Entity to the top of the screen, the faster you will accumulate points. For each plane of existence you pass through, you are rewarded 100 bonus points. When passing through every 10th plane of existence your helium tank is refilled and you earn 500 bonus points. On every 50th plane of existence you receive additional reserve Entity energy.

Force the Entity to move to the highest possible level of existence as fast as possible. Good luck and have lots of fun!

**NOW AVAILABLE FOR YOUR ATARI 2600:**

PICK UP –When You Score, You Score!!!

SAVE THE WHALES -A Whale Load Of Fun!

BANK HEIST –Fun You Can Bank On!

THE EARTH DIES SCREAMING -Beat the Aliens Or Bite The Dust!
