

GAMELINER NOTES

Hello GameLiners! Enclosed you will find **NINE** sensational new games just added to the Game-Line system — including the smash hit "Porky's" — all in time for your holiday season enjoyment.

To start with, we have one of the newest games from IMAGIC, **Moonsweeper**, that we feel is one of the best produced in 1983. We also have a great maze game, Fox's **Bank Heist**, for all you maze-crazed gamers. **Infiltrate**, (from Games by Apollo) should challenge even the most avid gamers with its elevators and deadly aliens.

And let's not forget **Nightmare**. This game from Sancho will be just that to any gamers who expect to sleepwalk their way through its many screens! Fans of that wild and crazy movie will be glad to see Pee Wee in **Porky's**, the winner from Fox.

As part of our effort to bring you games that are really unique, we're especially proud to feature **Save The Whales**. This is the first independent production from Steve Beck, the well-known designer, and we're betting it will have you panting for more.

Guardian places the player in a galaxy to be defended from Dromeda and the Androsian pirates. **Boing** has you as a bubble with 5 lives, bouncing around on a force field of 36 cubes. And **Polaris** seats you in the Captain's chair of a nuclear powered sub.

Some of our new games require more memory than those in the past. This results in a longer period of time for the game to be "downloaded" through the phones. If it takes a little longer for the game to appear, be patient; you're receiving a game that is tougher than the rest!

We think you'll have hours of fun with them all!

If you're wondering why you didn't receive your GameLiner Magazine last month, don't blame the Post Office. An expanded holiday issue was delayed due to printing complications and has been rescheduled for next month. We apologize for the communications gap this has caused, and are using this "Newsletter" to bridge the missing issue.

Our first contest kicked off with a bang — both **Demon Attack** and **Cakewalk** proved to be games that produced over 300 winners in 20 regions across the country. If you were one of this elite group, you have already been notified by mail and will be receiving your prizes shortly. Details on the next video challenge in an upcoming issue . . .

Looking ahead, there's great news for everyone now owning a Master Module. Without any extras to purchase, the same Master Module that works to give you all those fabulous games will take on extra tasks to make your life simpler, more convenient, and more a part of the streamlined electronic age.

During the first quarter of this year, StockLine and SportsLine will join GameLine on your Master Module. This means that you will be able to expand the use of your Master Module beyond games and into the world of information.

Without buying a personal computer that can cost many times the price of your Master Module, StockLine will provide the latest in major stock market index quotes (NYSE, AMEX, OTC, etc.) as well as commodities reports. A portfolio service will be added shortly thereafter, allowing you to program up to ten stocks for daily quotes on each.

SportsLine will provide the latest scores in both college and pro competition. The latest Las Vegas line on these games will be part of the service as well. You'll be notified when you can begin accessing these added benefits.

We'll be back in touch soon!
