User Manual

Before you begin play, it is suggested that you read the manual thoroughly. There are some things you need to know before using your discs with an Atari 2600 and a Supercharger.

Getting Started

You will need the following 3 items to play your discs on your Atari 2600:

1. A Starpath Supercharger <1>
2. Atari 2600 or compatible <2>
3. CD Player

<1> Modification of your Supercharger is necessary to play all games successfully.

<2> Note: The Supercharger may not work on some Atari 7800 machines and will not plug into the Coleco Expansion # 1 without modification.

General Notes the Supercharger and This CD Collection

The Supercharger can play about half of the games included on these Compact Discs without modification. The games marked with an * require modification of the Supercharger to play successfully. To modify your Supercharger, please follow the instructions below. (Note: Some games are in PAL format. Adjustment to the vertical hold of your monitor may be necessary)

WARNING: Although the modification of your Supercharger is relatively easy to do, we do not take responsibility for any damage done to your Supercharger or your Atari.

If you are uncomfortable doing this modification yourself, we suggest that you ask a friend who is knowledgeable in electronics. Some bribery may be required. If alcohol is involved the bribe, we suggest consumption after the modification.

Modifying your Supercharger

The following is re-printed with permission from Bob Colbert's webpage which can be found at (<http://www.novia.net/~rcolbert/scmod.htm>)

The Supercharger can load about half of the 2k and 4k ROM images for the Atari 2600. Unfortunately even those may crash later in the game. The only way to ensure that all 2k and 4k ROM images work on the Supercharger is to modify it. Shown below is a diagram of the modification necessary for the Supercharger to load ALL 2k and 4k ROM images. It involves opening your supercharger and soldering in a new chip, but it isn't that difficult.

See diagram on the back of this manual for the optional modification to play all games on this collection.

WARNING!!! WARNING!!! WARNING!!! WARNING!!!

Besides the fact that I take no responsibility for any damages done to your Supercharger, Atari (or compatible), TV, room, house, neighborhood, cat, dog, etc. resulting from any attempts made to make this modification, you need to be aware of one more thing:

If you are brave enough to try this and IF you succeed then:
MAKE SURE YOU PUT THE TOGGLE SWITCH IN NORMAL MODE BEFORE PLAYING ANY SUPERCHARGER GAMES!!!!!!!

Did I make my point? If you try to play a multi-load game with the toggle switch in the (modified mode) position, when it comes time to make second load, the game will most likely crash!

Acknowledgements

The following people are to be thanked. Whether they know it or not, they have helped make this project successful, either directly or indirectly.

First and foremost, Bob Colbert. His enthusiasm combined with his technical expertise in hardware and software has made much of this project possible. Play his game, Okie Dokie and drop him a line; let him know how you like it. Secondly, Paul Tomlinson, Lee Krueger, John Saeger, they are avid game players and Atari 2600 fans right down to their souls. The folks at Atari and the folks at Starpath, who in the golden years of Atari, gave us such wonderful games and hardware to play them on. All the people on the Stella List, especially the "techies" and their contributions to the hobby of, not only preserving the legacy of the Atari 2600, but moving forward with new ideas and games for us to play in the years to come. Finally, thanks must go out to all Atari game players everywhere, for without you, there would not have been an Atari.

2600 Homebrew Game Authors

Bob Colbert - Okie Dokie, Multi (Sabotage)

Chris Crackenell - Rescue Bira Bira, Virtual Pet, Video Time Machine

Soeren Gust - Mine Sweeper .99

Eckhard Stolberg - Beat Em Up, Domino, Say

Chuck Gill - Pac-Invaders

John Harvey - Pressure Gauge

Please note that many of these homebrew games are prototypes of early version of the games or experimental concepts to prove out Atari 2600 programming techniques.
